T "Molecular cloning of SCOGF-B, a novel growth factor homologous to SCOGF/PDGF-C/fallotein.";

Biochem. Biophys. Res. Commun. 280:733-737(2001).

I SIMILARITY: Belongs to the PDGF/VEGF growth factor family.

The cloning and expression of neuropilin-1.";

Submitted (JUL-2002) to the EMBL/GenBank/DDBJ databases.

Submitted (JUL-2003) to the EMBL/GenBank/DDBJ databases.

Le retain reuronal circuits and in organogenesis outside the nervous certain neuronal circuits and in organogenesis outside the nervous system. It mediates the chemorepulsant activity of semaphorins.

Regulates angiogenesis through a VEGF-dependent pathway.

SUBCLOMENORMENTAL STAGE: Expressed both maternally and zygotically.

Maternal transcripts are widely expressed until the early gastrula stage, then become localized to the yolk syncytial layer. During sommatogenesis and later stages of development, expression occurs mainly in neuronal and vascular tissues.

SIMILARITY: Contains 2 CUB domains.

SIMILARITY: Contains 2 FG/B type C domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               This SWISS-PROT entry is copyright. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                              US-09-818-943-2

Patent No. 6391311
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Ferrara, Napoleone
APPLICANT: Ferrara, Napoleone
APPLICANT: FULO, Sophia S.
TITLE OF INVENTION: NOTEL POLYPEPTIDES HAVING HOMOLOGY TO VASCULAR
TITLE OF INVENTION: RODOTHELLAL CELL GROWTH FACTOR AND BONE MORPHOGENETIC
TITLE OF INVENTION: PROTEIN 1 AND NUCLEIC ACIDS ENCODING SAME, THEIR USES,
TITLE OF INVENTION: AND PROCESSES FOR THEIR PRODUCTION
FILE REFERENCE: P1122
CURRENT APPLICATION NUMBER: US/09/040,220D
CURRENT APPLICATION NUMBER: US/09/040,220D
NUMBER OF SEQ ID NOS: 8
SEQ ID NO 2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  61 PRFPHTYPRNTVLVWRLVAVEENVWIQLTFDERFGLEDPEDDICKYDFVEVEEPSDGTIL 120
